# Adjustable End Stop

**ME-8971**

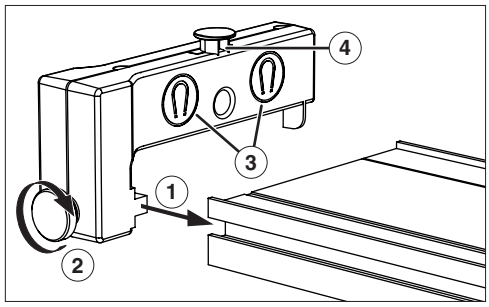

## Introduction

PASCO model ME-8971 is a set of two end stops for use with PASCO tracks and carts. It is compatible with any aluminum PASCO track and any cart such as the Plunger Cart (ME-9430), Collision Cart (ME-9454), PAScar (ME-6950, set of two), and GOcar (ME-6951).

## Installation

Attach each end stop to the T-slot on the side of the track as illustrated. Slide the end stop to any position along the track and secure it by tightening the thumbscrew.

One side of the end stop contains magnets to repel the magnetic bumper of a cart. The stud on top of the end stop can be used for attaching a spring or string. The hole is designed for use with a Spring Cart Launcher (PASCO model ME-6843).

**1:** Slide tab into T-slot on side of track. **2:** Tighten thumbscrew to secure end stop. **3:** Magnets repel cart's magnetic bumper. **4:** Spring attachment stud

## For Use with Older Tracks

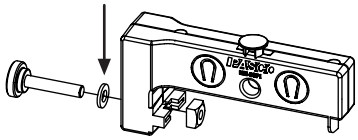

If you have an older PASCO track (see illustration), install the included washers to prevent the thumbscrews from "bottoming out."

**Newer track**
(No washer needed)

**Older track**
Lacks extra T-slot clearance.
Install washer on thumbscrew.

# Technical Support
